

Flower Shooting Assignment

This shooting assignment deals with subject matter and proportion. The subject is flowers. Try to shoot the flower(s) from an interesting angle. Proportion is the principle of design that deals with the size of shapes in relationship with each other. When you shoot your images, consider the colour, the mood, the size and the angle in which you are shooting.

Flowers should be fairly easy to find this time of year. If you do not have any flowers in or nearby your home, try going to your local park, a neighbours or a florist.
